

# Teacher Education Council Meeting

February 8, 2023

## Minutes

### **Harassment, Intimidation, and Bullying Training**

- We have the option to do this in house in lieu of having students pay and do the State training.
- EECE is open to sharing their materials so that other departments can use them as well. Reach out to James if you want to have the materials shared.
- Documentation of completers will need to be shared with the certification office in order for certification applications to be processed.
- You are welcome to create certificates through your department but it is not required.

### **Pre-Clinical 2 “Boot Camps”**

- Some programs do an intensive pre-clinical 2 professional development day that is associated with their student teaching seminar course.
- There is some interest (and some apprehension) in creating some shared professional development that would include all students starting clinical 2.

#### *Action Steps:*

Tab will sketch out possibilities for this experience and reintroduce the topic at a future date.

### **Accreditation**

- [Linda Amerigo](#) shared that our accreditation report is approximately 75% complete.
- She will continue to reach out to coordinators when information is needed. But, right now, nothing is needed from faculty.
- Linda forecasted the upcoming program review that will take place after accreditation.

### **Clinical Placements**

- [Cynthia Fulford](#) shared some highlights about her process for placing students.
- She asked that coordinators stress the importance of indicating the address where the students will be living during student teaching in the student teaching application.
- She shared that many districts require different types of information and are working from varied procedures and timelines.
- Students are encouraged to obtain sub certificates to aid in smoother placement opportunities.

**Request from Tab: If you think of a topic that you would like to see on a future TEC agenda, please let me know.**
