~~Olivia Chiarella~~ ~~Terrell Williams~~ ~~Su Weber~~ Shawn Cappellano-Sarver ~~Trish Le~~
Kevin McCullough Scott Sferra ~~Raymond Gonzalez~~ ~~Christopher Nitti~~

Attached files: FCPC Agendas & Minutes

Minutes

- Approved Minutes from the December meeting with no changes.
 - Late August 2023, a committee was formed to look at existing parking management software and find a replacement.
 - Current software is from 2012, vendor states product is now “End of Life”
 - Will launch new software in Fall 24, deciding between two finalists.
 - Submitting at the February 27, 2024 Board meeting for approval
 - New software features that will allow for efficiency and flexibility:
 - License Plate Recognition could be added for more streamlined and efficient enforcement
 - The new software would have an event module for the registration of visitors before coming to campus, they could potentially pay for their spot in advance
 - Paperless Feature: Electronic tickets and decals
 - Hoping to remove existing parking lot gates (60-80k yearly maintenance/ replacement gates)
 - Will continue to study parking issues and budget, and strategize with other areas to coordinate the launch of the new software
 - Annual Costs-Current software 14k (will be as much as \$250k upon renewal). New software costs ~\$40-80k annually
 - How do we best demarcate the chain movement in the Visitor lot?
 - Campus police are looking into possibilities like posting someone in the lot to educate people on the new parking
- Next Meeting: FCPC will start developing management plan for golf carts
